- Twill neck tape
- 1 x 1 ribbing at cuffs and waistband
- Sewn eyelets
- Woven label

Please note: The Mineral Wash process gives each garment unique vintage character, no 2 garments are exactly the same.

When making mineral wash garments we cut and sew black garments and give them the mineral wash treatment in special machines that wash 20-30 pcs at a time. Each garment will have different levels of mineral wash effects, please allow for slight color variation in production.

Care Instructions: Due to the nature of Mineral Wash, loose pigments may remain on the surface of the garments. We therefore strongly recommend washing these garments only with like-colored garments.

Mineral wash garments can be printed with plastisol ink. Always test mineral wash garments prior to production. A poly blocker base should be used to avoid any dye migration.

Mineral wash garments do not discharge.

**The main thing to be aware of when printing on mineral wash garments is the possibility of dye migration as well as unwanted ink (pin holes, finger prints, etc.) cannot be blown out and removed with spot remover guns.*

Spot remover guns will remove the mineral wash color on the garment as well as often leave a ring on the garment.
