

Lane Seven - Future Fleece Hooded Sweatshirt - LS18002

- 8.0 oz./yd², 55/45 regenerated cotton/regenerated polyester
- 100% regenerated yarn
- Double-needle topstitch on all seams
- Two-panel hood with fleece lining
- Dyed to match drawcords with tipped ends and metal eyelets
- Side seams

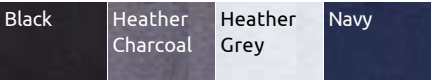

The yarn is composed of post-consumer waste, as well as scraps left over from the cutting stage of the garment manufacturing process. Because the yarn is repurposed, the material forgoes the dying stage, which reduces energy consumption by approximately 80%, water consumption by approximately 75%, and chemical consumption by approximately 90%.

By implementing water saving techniques in the dying process of Lane Seven fleece, the company is able to save 18 liters of water per garment

Lane Seven is a proud member of the Better Cotton Initiative. Cotton products from Lane Seven support more sustainable cotton farming

Lane Seven is certified by the Recycled Claim Standard, which guarantees the recycled polyester in their garments is traceable from origin to final products
