PRINTING INSTRUCTIONS FOR NYLON FABRICS

Due to the nature of Nylon fabric, special care must be taken throughout the decoration process. Special care must be taken during the decoration process and after.

Here are some tips to effectively decorate these products.

Heat Transfer/Screen Printing:

- Garment temperature must not exceed 310°F or 154°C.
- Use fast fashion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.
- A test sample run is recommended in all printing processes, especially if you have a large order or if your printer does not specialize in printing on Nylon fabrics.

EMBROIDERY INSTRUCTIONS FOR WATERPROOF GARMENTS

Due to the nature of the embroidery process, waterproof garments will be affected. Special care must be taken during the decoration

Here are some tips to effectively decorate these products.

- Use the smallest needle possible to limit the size of the hole in the shell of the garment. Make sure the needle is sharp and changed often to maintain this standard.
- The use of a heat activated waterproof sealing tape or patch on the back of the embroidered area is highly recommended.
- We suggest any brand of heat activated waterproof sealants suggested for outdoor clothing use.
